

# Chemical Safety

## Chemical Provided

- When arriving back you will receive disinfectant spray (see below) to use in your personal work space. This is only to be used at this location. e.g. desk, phone, & desk chair.
- Please do not spray or use in any other area, due to the potential of being mixed with current chemicals used by Building Services.

## Building Services Chemical's

- Building services uses an ammonia quaternary disinfectants, multiple times throughout the day. When cleaning & disinfecting offices, we will take care of those area's outside of your personal work station. e.g. light switches, door knobs, doors, common areas, bathrooms, etc.

# Chemical Safety

---

- Building Services chemicals follow the CDC guidance. They are a quaternary ammonia disinfectant with a ten minute contact time.
- During the ten minute contact time of the chemicals, we want to ensure everyone's safety by avoiding these chemicals coming in contact. This is why your spray should only be used on the areas previously mentioned.
- Mixing any chemicals is a hazard and can be harmful.
- Please reach out with any questions you might have.
